

WHAT IS AN INDIGENOUS-LED INTEGRATED RESOURCE MANAGEMENT PLAN (IRMP)?

HOW DOES AN **IRMP** FIT INTO THE FRAMEWORK FOR FOREST MANAGEMENT, RECONCILIATION & UNDRIP?

INFORMS GOVERNMENT TO GOVERNMENT STRATEGIC PLANNING

Supports Indigenous communities in their decision making process and informs discussions with the provincial governments regarding resource management policies and legal direction.

INFORMS TACTICAL PLANNING

Through collaboration with resource professionals and licensees, it informs the establishment of provincially legislated plans, including **Forest Stewardship Plans** or **Forest Landscape Plan**.

INFORMS OPERATIONAL PLANNING

Allows resource professionals to **translate actions and outcomes** into on the ground practices and **reduces administrative involvement** from site level consultation.
