

Forest Landscape Planning Overview for TFL 44

WHY FOREST LANDSCAPE PLANNING?

- Aligns with the *Declaration on the Rights of Indigenous Peoples Act (DRIPA)* and supports reconciliation with Indigenous Peoples
- Consensus-based process developed in partnership and collaboration with First Nations
- Supports transparency and local participation
- Addresses landscape level forest management challenges
- Addresses changing social values and expectations for forests
- Paradigm shift – co-management based – consensus based – ecologically based (resiliency and ecosystem health)

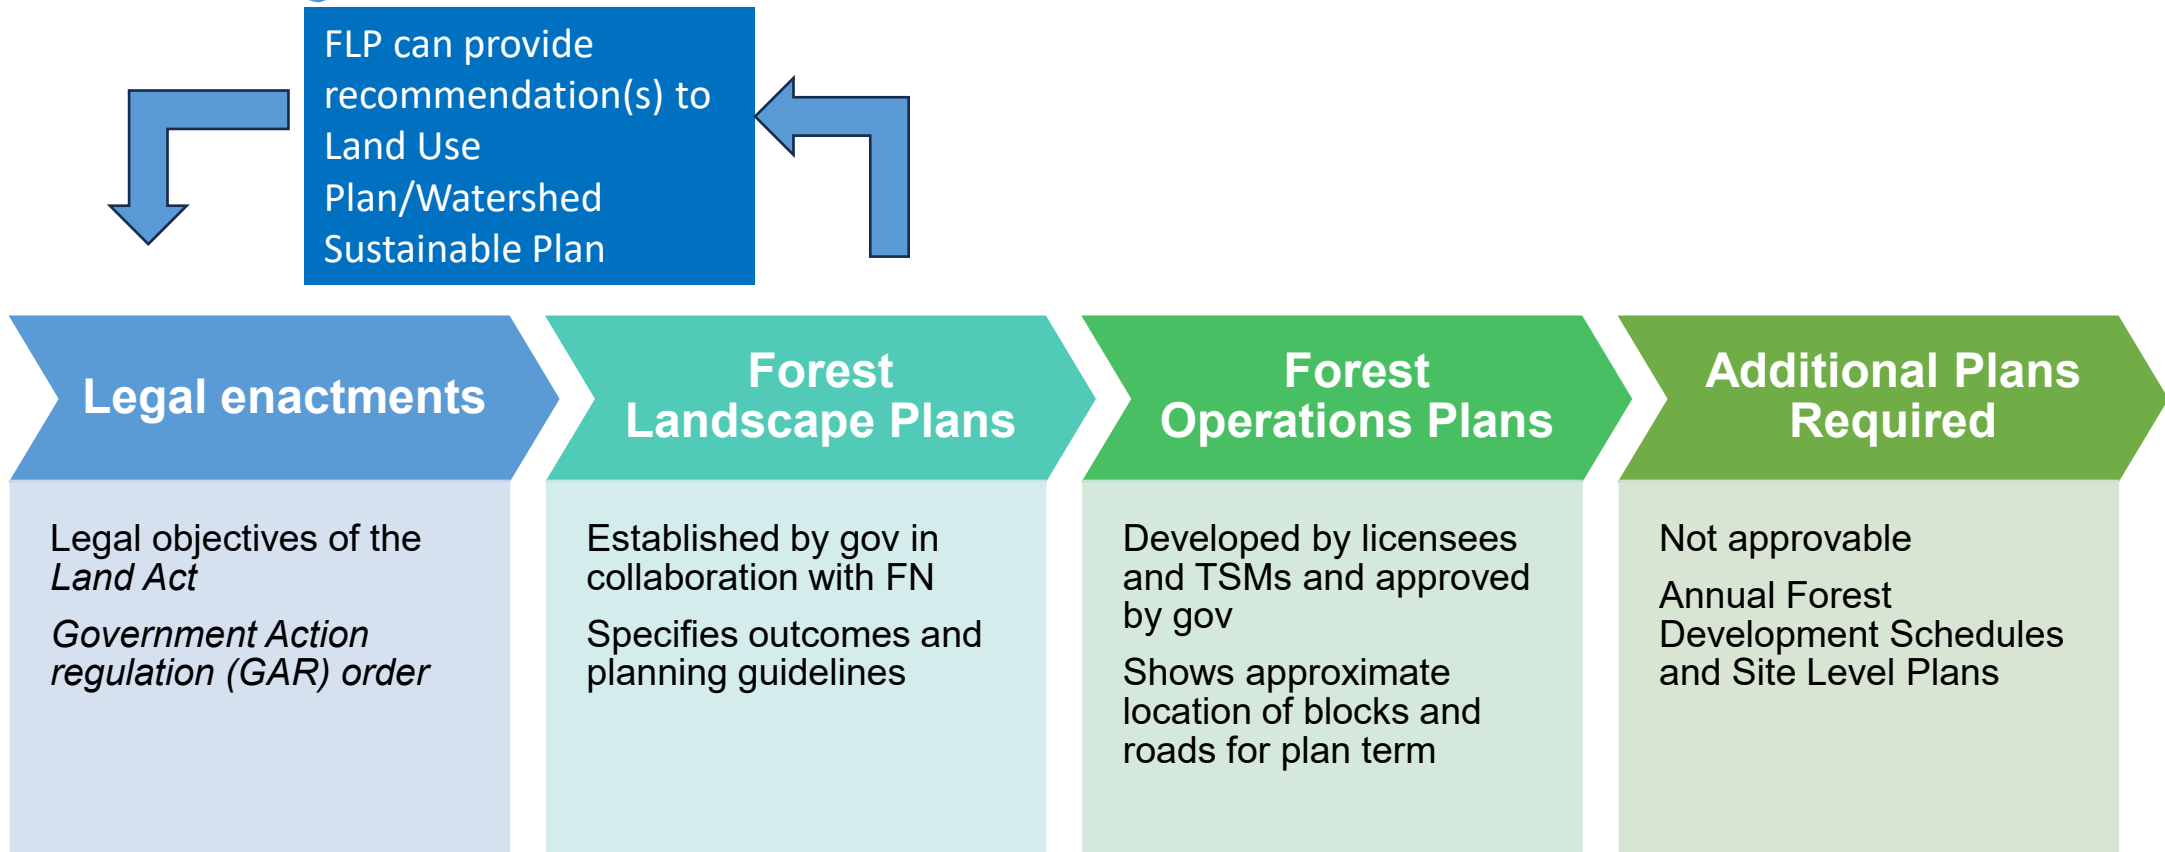

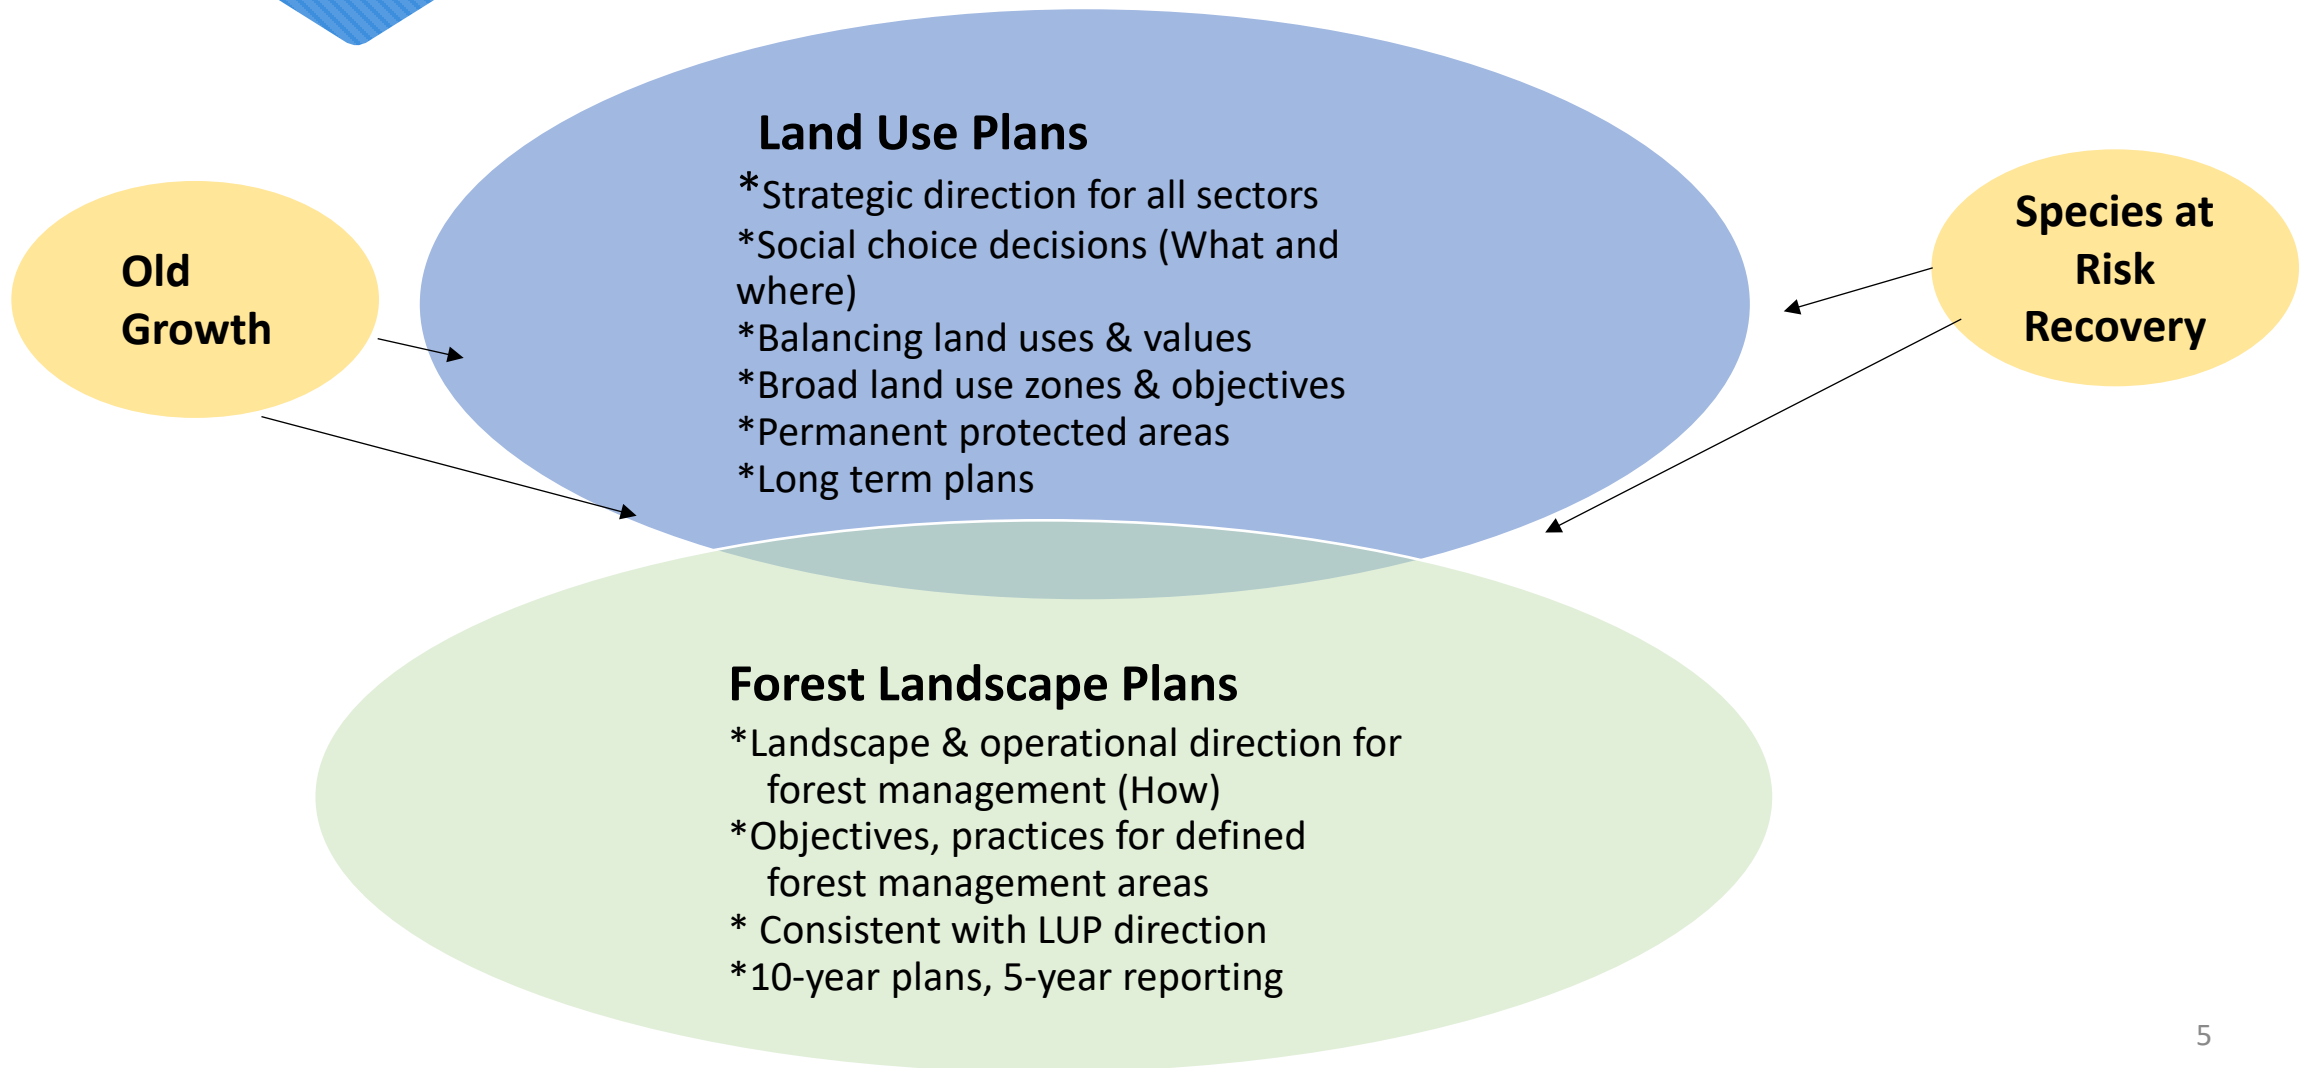

TRANSITION

- Existing planning framework: Forest Stewardship Plans (FSP)
- Phased approach
 - FSP will remain in place until Forest Operating Plans are approved.
 - During the transition, FLPs and FSP framework will not overlap geographically.

WHERE DOES FOREST LANDSCAPE PLAN FIT?

FLP SCOPE AND LINKAGES

WHAT'S IN A FOREST LANDSCAPE PLAN?

The FLP provides direction for the management of forest resource values and informs the development of the Forest Operations Plan

FLP Geographic Boundary Considerations

No legislated
geographic
boundary for FLP

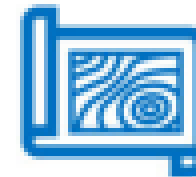

Alignment
with
Indigenous
Nations
interests

Contiguous
area

Capture
landscape
ecological
processes

Alignment with
timber supply
management
units

Consider
capacity
of all
participants

FIVE FLP OBJECTIVES

Managing the values placed on forest ecosystem
by Indigenous Peoples

Managing the values placed on ecosystems
by local communities

Supporting the protection and conservation
of the environment

Supporting production & supply of timber
in the forest landscape area

Preventing, mitigating, and adapting to impacts caused
by significant disturbances to forests and forest health

EXAMPLE FLP TABLE STRUCTURE

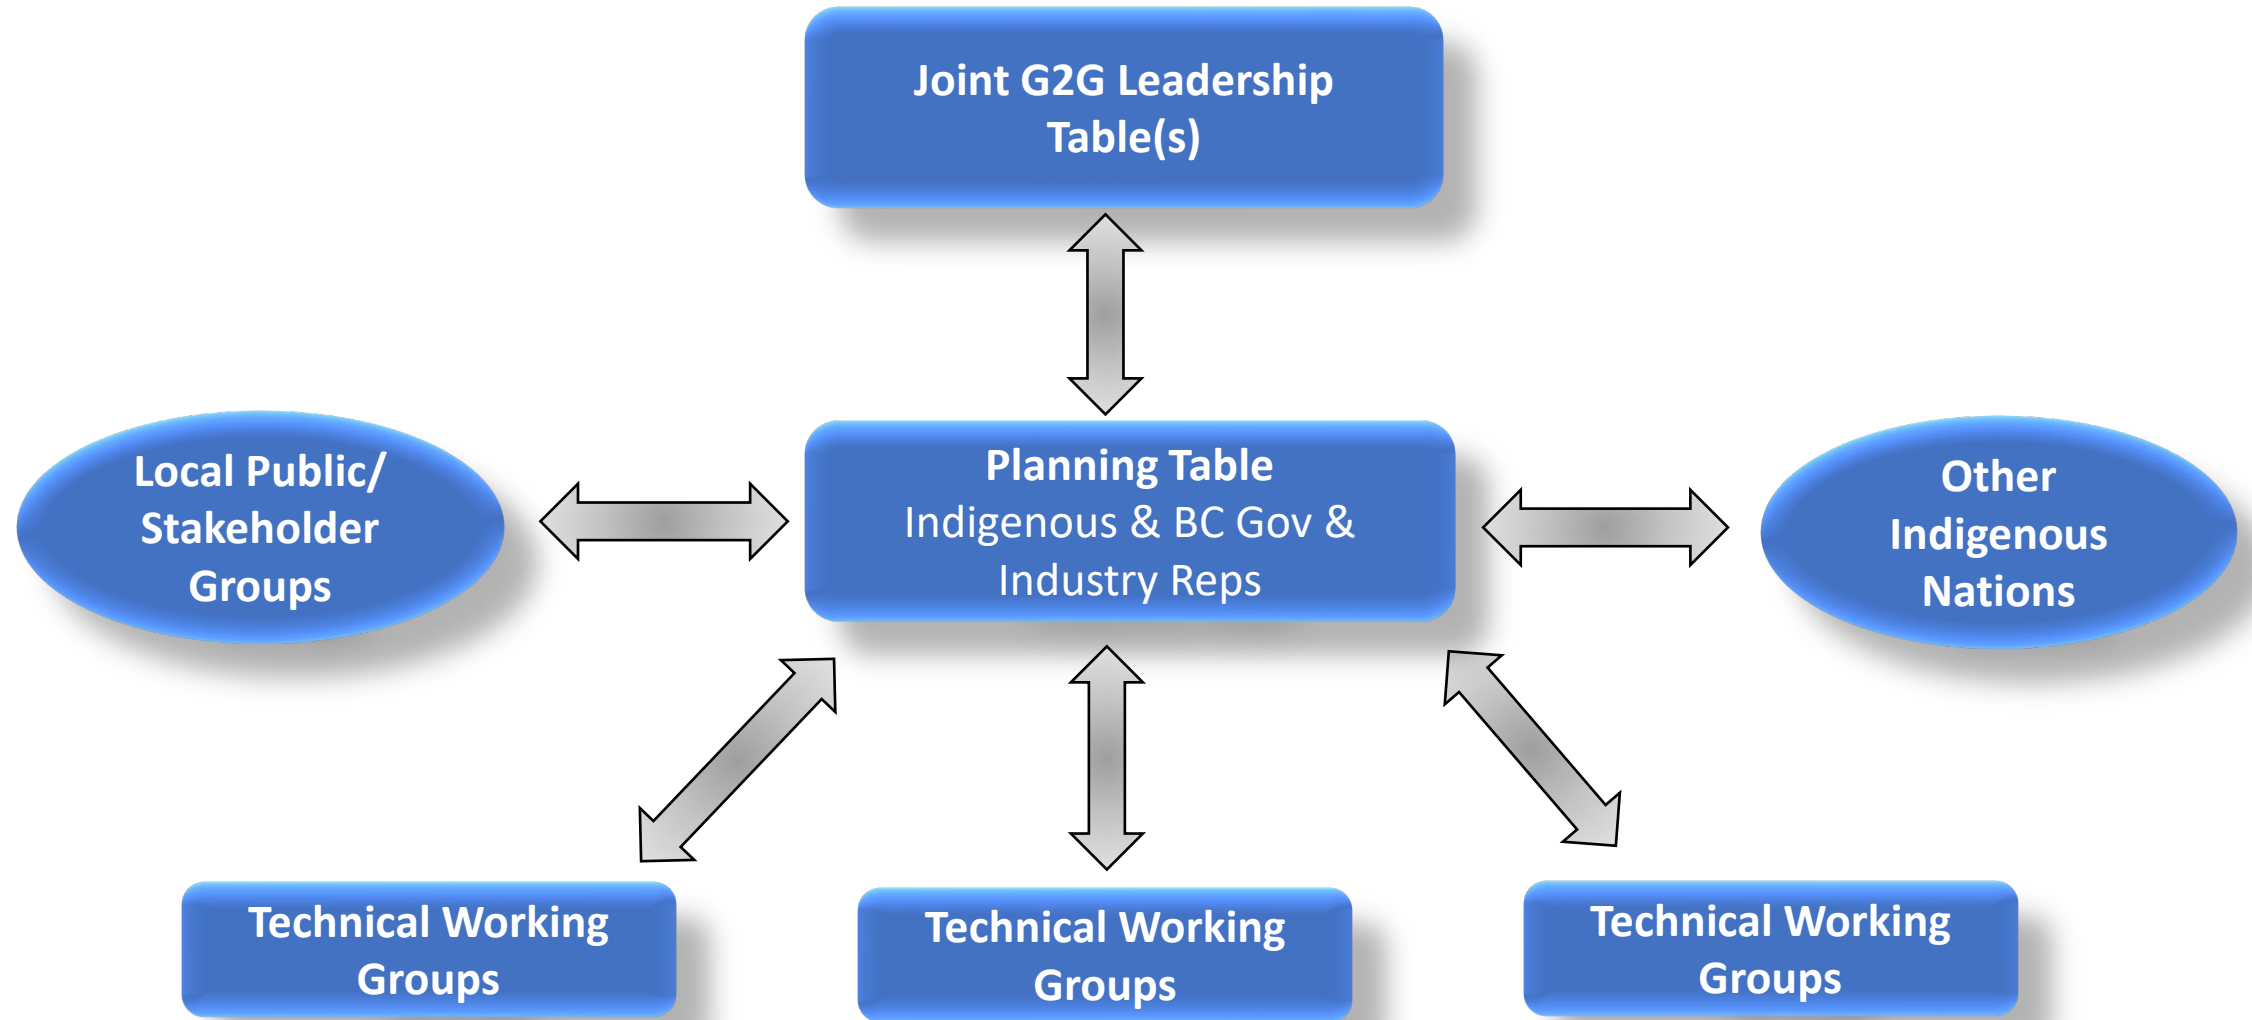

Table structure will depend on the FLP area, issues and participants.

VISION

- Working collaboratively with Indigenous Nation partners, FLPs seek to...

Develop directions for the forest sector to manage for ecosystem **health** and resiliency and support implementation of the **Old Growth Strategy**

Reflect local community **values** in forest management

Set landscape and stand level expectations for forest management & clarify the “where” and “how” for **harvesting** and other forest activities

Established, by order, by the Chief Forester & establish short term (10 year plan) direction to meet a long term vision for **future forest conditions**

Provide **certainty** for the forest sector & adaptive management with strong emphasis on monitoring

WHAT ARE THE PHASES OF A FLP?

1) FLP pre-planning

- Explore/scope interests
- Identify FLP area
- **Develop workplan/ Terms of Reference/ Indigenous consultation and cooperation process**

2) Values identification and assessment

- Current condition assessment
- **Confirm values**

3) Plan Development

- Identify preferred management strategy for selected values
- **Finalize draft plan recommendations**

4) Plan Establishment

- **FLP order**

5) Plan Implementation and Monitoring

- Develop and approve Forest Operations Plan(s)
- Implement monitoring plan
- Complete 5-year public report

**AAC
Determination**

PARTICIPANTS IN FLP PHASES?
